A Fish a Day Keeps the Doctor Away!

Numerous research studies have shown that adding a fish oil supplement to your dog's daily diet has numerous health benefits. Although originally it was used to treat dogs with allergies and skin diseases, today it is also used for good general health maintenance.

Omega 3 fatty acids are the important nutrient found in fish oil that enhances your little doxie's health. Physically your doxie will begin to benefit very quickly from fish oil but it can take as long as 3-4 months for her to develop a beautiful, radiant coat.

Fish oil makes internal organs "radiant" too. Your doxie's heart, liver, kidneys and brain will be healthier and he will be blessed with a happier and longer life to share with you.

Some research indicates that fish oil also helps dogs avoid old age diseases such as arthritis and brittle bones. It also serves as an anticarcinogen.

You can give your doxie fish oil in liquid form or in capsules and it is okay to give them human fish oil pills. There are fish oil products for dogs available in retail stores and online. Check with your vet on what dosage is right for your little doxie.

A dog is the only thing on Earth that loves you more than he loves himself.
